The screenshot shows a VS Code editor with a project named 'Resume_Ingestion_Architecture_Phasewise.md'. The 'Terminal' tab is active, displaying a REST client request and its response. The request is a POST to 'http://localhost:3001/v1/resume/inject' with a JSON body. The response is a 201 status code with a 'durationMs' of 824. The background shows a file explorer with a project structure and a chat window with a prompt about implementing error handling.

```

j Resume.pdf"
{"requestId":"8d5e84e1-83c9-4f64-bc9d-8d38479df777","fileName":"ARUN RAJ S
outcome":"success"}
{"requestId":"8d5e84e1-83c9-4f64-bc9d-8d38479df777","method":"POST","path
":"/v1/resume/inject","statusCode":201,"durationMs":824,"fileName":"ARUN RA
J S M.pdf"}

```

The screenshot displays the MongoDB Atlas Data Explorer interface. On the left sidebar, the 'Data Explorer' section is active, showing the 'resumes' collection under the 'hr_resume_portal' database. The main panel shows a document from this collection. The document contains the following fields and values:

```

{
  "_id": ObjectId('6aba034ed9cc2eb6fcc2b5d'),
  "fileName": "Abishh - Marketing (1) (1).pdf",
  "rawText": "Phone: +91 8668169115 Email: abzsh05@gmail.com Address: Native: Kanyakumari Working: Chennai DIGITAL MARKETING SPECIALIST | SEO & SOC...",
  "email": "abzsh05@gmail.com",
  "phone": "+918668169115",
  "location": "",
  "company": "",
  "role": "",
  "education": "Bachelor of Engineering | 2015-2019 PROFESSIONAL EXPERIENCE 1.SEO Manager Ludo Digitech | Sep 2023 - Present Managing SEO strategie...",
  "totalExperience": 1.5,
  "skills": Array (empty),
  "embedding": Array (1024),
  "embeddingModel": "mistral-embed",
  "embeddingDimension": 1024
}

```

The interface also includes a top navigation bar with the MongoDB logo and a search bar. The bottom status bar shows the alert system status as 'All Good' and provides links to the status, terms, privacy policy, atlas blog, and contact sales.

Implement next phase with error handling

implement the ingestion of files from the Resumes folder ,
process the 10 files now and check if the ingestion is...

ingest the files batch by batch . each batch should ingest 10
files . resolve if any error occurs and provide a success
message once completed

The first ten PDFs are already ingested, leaving 170 supported PDFs,
which I'll process as 17 batches of ten without re-ingesting that first
batch. The folder also has 19 DOC/DOCX files; the current API only
accepts PDFs, so I'll report those separately rather than silently
treating them as processed. I'll run the next ten first and check for
errors before continuing.

Implement next phase with error handling

ingest the files batch by batch . each batch should ingest 10 files . resolve if any error occurs and provide a success...

Completed 28 steps in 5m 42s

Processed the remaining 170 PDFs in 17 batches of 10. 155 succeeded, combined with the first 10 processed earlier, MongoDB now contains 165 of the 180 PDFs. I verified the stored count against the filenames.

15 PDFs were not ingested: 13 have no extractable text (likely scanned/image-only PDFs), and 2 have damaged cross-reference tables. There's no OCR or PDF repair tool installed, so I couldn't recover them. The folder also contains 19 .doc / .docx files; the current endpoint accepts PDFs only.

Successful records were stored. Failed files were not inserted.
